📅 02 - 01 – 1988

Driving Licence: B

Skills

- Java
- JavaScript
- Gherkin
- Selenium
- Cucumber
- Cypress
- JUnit
- TestNG
- Jenkins
- Maven
- Git/GitHub
- SQL & JDBC
- Postman
- Selenium WebDriver
- REST Assured Library
- JIRA & JIRA-Xray
- Robot Framework
- API, UI, and Back-End Testing
- Data-Driven Framework
- Behavior-Driven Framework
- Hybrid Framework
- Agile Development & Scrum
- C Sharp
- .net framework

As e-Commerce Specialist

- Amazon Sales Consulting
- eBay Sales Consulting
- Ad Management / Photographer

Emre Dursun
Curriculum Vitae

Work Experiences

QA Automation Test Engineer
2021 – 2022   Medunna Health Project – TechProEducation

What is the project about?

- The team's task was to develop **a hospital portal** that **provides access to patients, specialists, hospital staff, and administrators**.
- The project consisted of **a list of user stories and minimum test cases** to cover all aspects of the portal.
- The user stories included various **functionalities** such as **login/identity access, user authorization, user registration, appointment scheduling, patient information management, and staff management**.
- The test cases included **validating user input, API and database validation, as well as creating, updating, and deleting** various entities such as **user registration, appointments, and patient information.**
- To ensure that the portal fulfilled all customer needs, as outlined in the **Business Requirements Document (BRD)**, we conducted thorough testing. This included **functional and regression tests, covering UI, backend, and API**.

My daily role in my last project:

- ❖ My primary task was **to develop and manage the Automation Framework based on acceptance criteria, execute test cases, and report defects**.
- ❖ I also collaborated with developers and other team members to identify and resolve issues to ensure the quality of the software and provided feedback and suggestions to improve the overall quality of the software and ensure that all functions are well integrated and tested.
- ❖ The framework consisted of **Selenium Web Driver, Java, OOP Concept, JUnit and Cucumber** for testing **application UI and backend tests**.
- ❖ API testing was performed using **Postman and Rest Assured Library**.
- ❖ Used **Scenario Overview** and **Apache POI** to test multiple test data.
- ❖ Used **Maven**, to manage project dependencies and deploy the resulting artifacts.
- ❖ The framework is integrated with **Jenkins** for continuous integration and deployment.
- ❖ The project was executed as an **full life cycle of an Agile project** and applied **the best Quality Assurance practices to ensure Functional Testing of new features** being added every Sprint, as well as full **Regression Testing** for all previously implemented functionalities in every Sprint.
- ❖ The result was a **fully completed set of functional and non-functional test scripts** and a portal that met the customer's requirements.

Software Tester & e-Commerce Specialist
2020 – 2022 BSG Auto Parts B.V. & Nerex Motors B.V.

BSG Auto Parts and Nerex Motors sell car parts to businesses and individuals through online channels, including B2B and B2C platforms such as Amazon, eBay, and AutoDoc SE. They are based in Amsterdam-Westport and have customers in 94 countries worldwide.

There are several specific tasks that I perform there, such as:

- ❖ As a software tester, I was responsible for testing recently integrated functionalities within the company's ERP system. My role was to provide a comprehensive report to the development team that outlines the performance of the new features related to B2C order management, stock movements, order pick-pack process, invoicing, and logistics systems.
- ❖ Creating B2C marketing for this company to sell their products on e-commerce platforms by optimizing their business strategies and increasing their revenue on European marketplaces.
- ❖ As an e-commerce associate, I optimized and enriched product search terms such as 'Generic Search Keywords' and 'OEM Numbers' based on the requirements of Amazon and eBay, so that BSG products can be easily found by customers in EU e-commerce searches compared to their competitors.
- ❖ Optimizing BSG SKU Content, SKU Price Management, and inventory synchronization between retail network and e-commerce platforms.
- ❖ By using sponsored ads on Amazon and eBay, I increased the visibility and sales of BSG SKUs

Junior Web Developer
2018 – 2019   Student Affairs Coordinator at LiveCoding (https://livecoding.nl/)

Netwerk Marketing & e-Commerce
2017 – 2020   Herbalife Independent Distributor

Mathematics Instructor in International Schools
2016 – 2017   Mohammed Al Fatih Schools - Marocco
2014 – 2016   International School of Bucharest – Roemenie

- Secondary School – Math Teacher - Graden 8 & 9 & 13

Education

PD - Software Technologie Courses

2021 - 2022   **Techpro Education -** Full Stack Automation Test Engineer
2019 - 2020   **Endoor -** Front & Back-End Software Development (Enschede)
2017 - 2018   **Hack Your Future Coding School (Amsterdam)**
- The Fundamentals Of Full-Stack Web Development

BBA - Bachelor Degree

2007 – 2013   **Istanbul Universiteit -** Bachelor of Science – Mathematics

Courses & Trainings

2018 - 2019   **Saxion Language Center SSC - Dutch Course – B2 Plus**
2018 – 2019   **Utrecht University English Academy - IELTS**

Certificates

2023	ISTQB Foundation, Professional Scrum Master – Foundation (pending)
2021 – 2022	Techpro Education - Full-Stack Automation Engineering Program
2019 – 2019	Front-End & Back-End Software Development Course (Enschede)
2018 – 2019	Saxion Talencentrum - Cursus Nederlands – B1 Plus (Enschede)
2017 – 2018	Hack Your Future Coding School (Amsterdam)
2017	Herbalife Nutrition - Certificate of Achievement – Supervisor
2015 – 2016	Lumina Educational Institutions – Outstanding Efforts Certificate
2007 – 2013	Istanbul Universiteit - Wetenschappelijk Onderwijs – Wiskunde

Biography

✍ My name is Emre and I am 35 years old and single. I was born and raised in Turkey. In 2013, I graduated with a bachelor's degree in mathematics from a scientific education program. Immediately after graduating, I moved abroad and worked as a mathematics teacher at international schools for 3 years. I came to the Netherlands for political reasons when the school where I was teaching in Morocco was closed by the Turkish government in 2017. Between 2017 and 2020, I took several integration-related courses in personal, professional development, and language.

⚡ During this period, I took various courses for Front-End & Back-End Software Development. Because of my interest in e-commerce, I also developed myself in this area. Then, I got the opportunity to work as a manual tester and e-commerce employee at a company in Amsterdam-Westpoort that sells auto parts on various e-commerce platforms such as Amazon, eBay, and AutoDoc SE.

🔭 My passion for the past few years has been taking online/live courses and tutorials on QA Automation Engineering. I wanted to develop my skills in Test Automation alongside my skills in manual testing that I gained in my previous job. That's why I enrolled in the 1-year Full-Stack Automation Engineer Training at Techpro Education. I successfully completed this and worked on various projects, including a real-time agile project.

🔒 I have expertise in testing both the front-end and back-end of web applications. I have worked with Java, JavaScript, Cucumber - Selenium - Cypress - Robot Framework, Maven, SQL, UI testing, Database testing, and API testing (Postman and Rest Assured Library). I am familiar with Scrum, Jira, Jira-Xray, and Git, and I am also familiar with the Agile methodology and have experience with back-end and front-end development.

👀 I enjoy learning about new tools and staying up-to-date with the latest technologies and trends in the industry. Currently, I am focusing on expanding my experience and knowledge in AWS & DevOps environments. I am looking for challenging projects that allow me to utilize my strong technical skills, attention to detail, and collaborative work style to help create high-quality software.

🏆 "Full-Stack Automation Engineering" is a vast and creative field. It is also demanding and extremely rewarding. A career as a QA Engineer gives you the opportunity to learn about the business as well as technology. Technology is extremely fast-moving, and QA Engineers need to learn new technologies and adapt to the continually changing environment.
